Summary

I am a full stack developer with experience ranging from web APIs to embedded systems. I have a passion for learning new technologies to implement projects both effectively and efficiently.

Skills

Primary Programming Languages: JavaScript, C#, C++

Other:

Ability to handle numerous responsibilities and desire to learn required skills

Experience working in an agile development environment, implementing project features over a series of iterations within a release cycle

Experience

Carrier Global Corporation

Software Engineer

Software Engineering Intern

- Responsible for the development of a web-based video streaming interface for security applications (with technologies including ES6, TypeScript, Node.js, RxJS).
